### New Ulaanbaatar International Airport Set to Open in Mongolia

Mitsubishi Corporation (MC), Narita International Airport Corporation (NAA), Japan Airport Terminal Co., Ltd. (JAT), and JALUX Inc. (JALUX) are pleased to announce that the New Ulaanbaatar International Airport (Official name: Chinggis Khaan International Airport) will be officially opened to the public on July 4, 2021. The new airport will be operated by the partners' joint venture with the Mongolian government that was established in 2019. Under the terms of its concession agreement with the government, New Ulaanbaatar International Airport LLC (NUBIA) will be in charge of airport operations for the next 15 years.

The new airport was originally scheduled to commence operations in 2020, but the opening was delayed because of the COVID-19 pandemic. All assets have now been safely transferred from the old airport (Buyant-Ukhaa International Airport), thereby readying the new airport for flights and passenger traffic.

Although the pandemic has significantly reduced air travel in Mongolia, demand for flights is expected to increase over the medium to long term, particularly in Ulaanbaatar, the country's capital and center of its political and economic activity. The new airport will likely play an increasingly prominent role over the coming years.

In operating the new airport, NUBIA will be taking advantage of the combined expertise of its four shareholders. MC boasts a strong track record in airports and other infrastructure projects in Japan and around the world, while NAA and JAT operate Narita International Airport and the passenger terminal buildings at Haneda Airport respectively. JALUX is engaged in airport retail businesses and also has experience managing overseas airports. In addition to prioritizing passenger safety, security and comfort, NUBIA plans to leverage the new airport to increase the number of routes and flights servicing Ulaanbaatar, develop attractive in-terminal commercial facilities, and otherwise enhance the new airport's services and profitability.

While maintaining all precautions to prevent the spread of COVID-19, NUBIA is committed to building on a facility that is already being heralded as a symbol of bilateral cooperation between Japan and Mongolia, and in operating the new airport efficiently, the joint venture will do its best to contribute to the sustainable development of Mongolia's economy and society.

<Project Overview>

Location: Tuv Province, Mongolia (about 50 km southwest of Ulaanbaatar City)

Annual Passenger Traffic: As of 2019, the old airport was capable of servicing 1.61 million passengers (1.2 million for international routes and 410,000 for domestic routes)
